EDUCATION

University of Waterloo

Bachelor of Applied Science, Honours Management Engineering

Sep 2021 – May 2026

Waterloo, ON

TECHNICAL SKILLS

Product & Research: Stakeholder interviews, research synthesis, requirements, prioritization, roadmaps, acceptance criteria

Analytics: Google Analytics, Hotjar, Looker Studio, Excel, Qualtrics; funnels, session replay, task success, time-on-task

Delivery & Technical: Jira, Confluence, Arena, Figma; Python, TypeScript, SQL, React/Next.js, Pydantic, PostgreSQL, REST APIs, Git/GitHub; PyTorch, Ollama, local LLM inference, structured outputs, retrieval pipelines, grounding, evaluation, automated testing

EXPERIENCE

Product Engineer Intern

Sep 2025 – Dec 2025

ForceN

Toronto, ON

- Built a transfer workflow for 14+ Dev System units spanning procurement, assembly, calibration, QA, and fulfilment, moving production toward finished inventory and cutting turnaround time by **35%**.
- Standardized UID records, work instructions, calibration gates, and rework rules across engineering, operations, and inventory, reducing assembly errors by **25%** and improving on-time delivery by **30%**.

Product Designer Intern

Jan 2025 – Apr 2025

Greenhouse Juices

Mississauga, ON

- Designed customer flows and creative for 12+ Amazon, Klaviyo, retail, and trade-show campaigns; reporting showed **20%** higher engagement and a **12%** conversion lift.
- Built shared UID, inventory-routing, and launch-readiness tracking in OneDrive and Microsoft Planner for an 8-person team, improving delivery consistency by **25%** and shipment accuracy by **30%**.

Product Operations & UX Research Intern

Sep 2023 – Dec 2023

Informatica

Mississauga, ON

- Translated UX research and analytics into page and interaction requirements for a cybersecurity curriculum; internal reporting showed **18%** higher engagement and **20%** better task efficiency.
- Split delivery into four workstreams and tracked owners, dependencies, and deadlines in Planner and Loop for a six-person team, improving on-time delivery by **30%**.

Product Design & Marketing Intern

Jan 2023 – Apr 2023

Hera Fertility

Remote, New York, NY

- Scoped five MVP features and a six-week roadmap from stakeholder input, a nine-product audit, and Analytics/Hotjar data.
- Redesigned prequalification through four Figma iterations, reducing address entry from four fields to one (**75% fewer inputs**) and supporting account segmentation across three treatment paths.
- Built Looker Studio and Excel dashboards for 500+ users; traffic and conversions rose about **50%** during the internship.

Product Designer & Developer Intern

May 2022 – Aug 2022

PathPeer

Remote, Waterloo, ON

- Reviewed hundreds of weekly Hotjar sessions and Analytics drop-offs as one of two designers and developers, prioritizing five search improvements; engagement rose **50%** and inactive-user drop-off fell **40%**.

PROJECTS

RoomEase | *Intelligent Room Booking Platform* | [GitHub](#)

Sep 2025 – Apr 2026

Figma, React / Next.js, Supabase / PostgreSQL, five-person capstone team

- Interviewed administrators and student organizers to map booking across 34+ websites, defining requirements for conflict detection, accessibility, and explainable room allocation.
- Built a two-stage recommendation flow that filtered hard constraints before ranking fit; rationale tags and reason-coded overrides made results auditable.
- Converted static Figma screens into a stateful React/Supabase prototype after testing exposed double-booking risk, raising usability from **50% to 88%** and cutting booking time from **8.5 to 4.5 minutes**.

Chronicle | *Evidence-First AI Research System (In Development)*

2026 – Present

Python, Pydantic, TypeScript, React, Ollama, local LLMs, MapLibre GL JS

- Designed an evidence-first workflow that binds AI-generated claims to sources, counterevidence, uncertainty, and map/timeline context, making results auditable rather than black-box.
- Built a resumable eight-stage Python pipeline with file persistence, input-hash reuse, shared Pydantic/TypeScript schemas, local Ollama inference, and ten typed corpus tools; **500+ automated tests** enforce corpus isolation and reject unsupported citations.
